Recycled material content in Silestone®

In 2020, we have introduced HybriQ+ Technology® in our manufacturing process, which, among other things, identifies all colours and series with a pre-consumer recycled raw material content above 20 %, up to 60 % in some colours.

According to ISO 14021 definition, pre-consumer recycled material is material recovered from the waste stream during a manufacturing process, without taking into account the reuse of reprocessed, shredded or scrap materials generated in the process that can be reused during the same manufacturing process that generated them.

See the colours with pre-consumer recycled material in the table below:

Colour	Recycled material	Classification	Colour	Recycled material	Classification
Aluminio Nube			Faro White		
Arcilla Red			Iconic White		
Cala Blue			Nolita		
Camden			Ocean Jasper F		
Cinzel Grey			Pietra		
Corktown	≥ 20 %	HYBRIQ+	Poblenou	≥ 20 %	HYBRIQ+
Ethereal Cloud			Posidonia Green		
Ethereal Dusk			Seaport		
Ethereal Glow			Stellar Blanco 13		
Ethereal Haze			Stellar Grey		
Ethereal Indigo			Stellar Negro		
Ethereal Noctis
