

# LEED ATTESTATION

## Attestation

LEED v4: Schools and Hospitals EQc2 for exterior applied Roofing Membranes

Sika certifies based on the present state of knowledge, that the products:

**Sarnafil® TS 77 (all thicknesses)**  
**Sarnafil® TG 66 (all thicknesses)**  
**Sarnafil® TG 76 Felt (all thicknesses)**  
**Sikaplan® TM (all thicknesses)**

produced in Sarnen, Switzerland, and the products:

**Sikaplan® G (all thicknesses)**  
**Sikaplan® SGmA (all thicknesses)**

produced in Troisdorf, Germany,

which are exterior polymeric waterproofing materials based on flexible polyolefin (FPO) or polyvinyl chloride (PVC) applied on site, are inherently nonemitting sources of VOCs and are considered fully compliant with LEED v4 credit EQc 2 - low-emitting materials for Healthcare and Schools. They do not require any VOC emissions testing as they do not include integral organic-based surface coatings, binders or sealants.
